📍 Mumbai

Experienced Java Developer with over 3 years of hands-on expertise in building scalable web applications using Java, Spring Boot, Hibernate. Proficient in working with databases such as Oracle, MySQL, and MongoDB. Demonstrated ability to work independently in remote setups, deliver results on time, and collaborate effectively with distributed teams. Skilled in Agile methodologies and DevOps tools, ensuring efficient project delivery and team collaboration.

Skills

Critical Thinking, Problem-Solving, Teamwork, Collaboration, Strategic Planning, Risk Assessment, Database Management and Software Development, Business Intelligence (BI), Application Support, Electronic Banking, Digital Delivery.

Technical Skills

- **Backend and Frontend Development Technologies** :- Java, Java 8, Spring Boot, Hibernate/JPA, Microservices, Servlet, JSP, HTML, CSS, JAVASCRIPT.
- **Databases (Cloud & DevOps)** :- Oracle, MySQL, MongoDB.
- **Development Tools & Platforms** :- Maven, Gradle, Git, GitHub, WebLogic, Tomcat, Eclipse, IntelliJ IDEA, Spring Tool Suite (STS).
- **Security (Logging & Monitoring)** :- SSL, Log4j, SLF4J.

Experience

ASSOCIATE SYSTEM ANALYST

Dec 2022 to Present

NuSummit Technologies

Project : Collateral | Client : NSE

- Resolved high-priority production bugs in real-time environments, significantly reducing downtime and improving system reliability and client satisfaction. Designed and implemented a secure File Upload Maker-Checker system, introducing validation and approval workflows that reduced manual data entry errors by over 60%. Automated security pledge report generation and established SFTP-based secure transmission, enhancing compliance with regulatory requirements and ensuring timely delivery to external depository systems. Configured and deployed SSL certificates across multiple services, strengthening system security, enabling encrypted communication, and achieving compliance with internal IT security standards.

Job Responsibilities:

- Coding and Unit Testing of application.
- Defects fixing.
- Involve in daily meeting with team.

Project : SecPledge | Java 7 , log4j , PL/SQL

Dec 2022 to Present

- Developed and maintained SecPledge, a reporting system generating security pledge reports for trading members and custodians.
- Handled two report types: Member and Custodian, ensuring accurate pledge data delivery.
- Upgraded the logging framework from Log4j 1.1.7 to Log4j 2.20, enhancing application monitoring and performance diagnostics.

Job Responsibilities:

- Developed and maintained Java-based enterprise applications, primarily using Java 7, JSP, Servlets, and PL/SQL.
- Designed and supported the SecPledge reporting system for trading members and custodians, managing both Member and Custodian pledge reports.
- Migrated legacy logging framework from Log4j 1.1.7 to Log4j 2.20, improving logging efficiency and system observability.
- Implemented backend business logic, data validation, and automated scheduled report generation.
- Collaborated with QA and business teams to gather requirements, fix production issues, and ensure seamless report delivery.
- Optimized SQL queries and database procedures for better performance and faster report generation.
- Followed secure coding practices and contributed to code reviews, documentation, and version control using Git/SVN.

Education

Mumbai University

- B.Tech -Computer Science Engineering
- IES COLLEGE OF TECHNOLOGY. (RGPV UNIVERSITY)

2018-2022
